Netherlands Journal of Agricultural Science

Volume 43 (1995)

Subject index

This index lists the keywords given in the headings of the papers. A number refers to the first page of the paper involved.

agricultural research 127
agrodiversity 127
agro-ecosystem 127
Allium porrum L. 233, 435
ammonia emission 351
atmospheric CO_2 concentration 183
automatic milking 261
aviary housing 351
battery cage 351
below-ground competion 321
Beta vulgaris L. 391
biocide index 61
Brassica oleracea var. *botrytis* 409
Brassica oleracea L. 217
Brassica oleracea L., var. *gemmifera* DC 419
Brussels sprouts 217, 419
carbon balance 183
carbon sequestration 183
cattle 297
cauliflower 409
composting 313
compound feeds 297
Costa Rica 5, 19, 31, 83
crop growth variability 375
DCD 195
decision support 391
digestibility 287
digestion 313
dry matter distribution 419, 435
dry matter production 419, 435
Fagus sylvatica 321
farm household model 111
feed tables 297
fertilizer band placement 409
fertilizer use efficiency 47
genetic diversity 127
GIS 5, 19
grassland 183
heat fluxes 163
humus 313
indigenous knowledge 375
in sacco 297
labour requirement 261
land use analysis & planning 83
land use optimization 47
land use scenarios 5, 19
land use systems 31, 61
laying hens 351
leaching 195
leaf development 217, 233
leaf expansion 217, 233, 247
leaf initiation 247
leaf senescence 217, 233
leaf size 247
leek 233, 435
lignin 313
linear programming 47, 83, 111
linear programming models 5
local fertility mangement 375
maize canoypy 163
management 183
manure and litter handling 351
micro-meteorological model 163
microsclerotia 205
millet 375
mineral nitrogen 195
model 183, 261
modelling 19
nitrogen 313
nitrogen concentration 419, 435
nitrogen distribution 419, 435
nitrogen fertilization 391, 409
nitrogen fertilizer recommendation 333
nitrogen nutrition 217, 233, 247, 419, 435
nitrogen uptake 419, 435
nutrient balance 61
onions 333
operation sequence 31
Pennisetum glaucum (L.) R.Br. 375
pigs 287
potato 205
price instruments 111
protein 297
Pseudotsuga menziesii 321
quality 409
quantitative land use analysis 31, 61

region 143
reproduction 205
requirement 287
resource use efficiency 127
root biomass 321
root density 321
root length 321
rooting strategy 321
scenarios 83
sensitivity analysis 163
simulation 143
simulation model 391
slurry 195
soil mineral nitrogen 333, 409
soil parameters 163
Solanum tuberosum 205
spatial distribution of land use 61
spatial variation 143
spinach 247
Spinach oleracea L. 247
split application 409
sugar beet 391
sustainability 5, 127
sustainable agricultural development 83
sustainable land use 111
task time program 261
temperature 183
The Netherlands 183
tryptophan 287
uncertainty 47, 143
validation 163
variation management 127
Verticillum dahliae 205
West Africa 375
yield 409
yield forecasting 143
